🌐 Portfolio

SUMMARY

Full Stack Developer with nearly 3 years of experience building production-grade enterprise applications using **React.js**, **Node.js**, and **Python**. Experienced in **Component-Based Architecture**, **REST API Integration**, **Big Data (Hive, HDFS)**, **LDAP**, **JWT**, **VAPT**, and **CI/CD** automation for banking systems, delivering measurable improvements in turnaround time and data integrity.

EXPERIENCE

Associate Software Engineer, Accenture

Sep 2023 – Present

Mumbai, India

- Replaced a manual Excel-extract-edit-overwrite process with a **direct form-based workflow** pre-filled from **Cloudera Hive**, reducing the data update cycle from 1-2 days to a few hours (**60-70% reduction in turnaround time**).
- Built a full audit trail via **maker-checker (dual control)** functionality, ensuring every data change is tied to a recorded requester and approver — replacing a process with zero traceability.
- Implemented **save-as-draft** functionality, consolidating previously multi-version email/Excel exchanges into a single saved entry, reducing duplicate submissions by an estimated **30-40%**.
- Designed and developed a **full-stack enterprise web application** using **React.js**, **Node.js**, **Python**, **Apache**, and **Component-Based Architecture**, enabling users to submit form data and upload files directly into **Cloudera Hive** via **WebHDFS** with **override/append** support.
- Developed reusable **React components**, integrated **REST APIs** using **Axios**, and implemented **asynchronous data fetching** for efficient data processing.
- Developed **Role-Based Access Management (RBAC)**, schema management, reporting management, and user management modules implementing **authentication** and **authorization** to support secure, structured, multi-team, audit-compliant enterprise workflows.
- Architected the **end-to-end workflow** for the GAP Application and built a **deployment management module** with a dedicated deployment page for tracking production releases.
- Implemented **field-level validation**, file preview, **responsive user interfaces**, automated conversion of uploaded data to **Parquet** format, **SMTP email notifications** for submission events, and **performance optimization** for efficient file processing.
- Integrated **LDAP authentication**, **JWT-based authorization** and session management, configured **Apache Web Server** across **Development**, **UAT**, and **Production** environments, and participated in **code reviews** to ensure secure and maintainable deployments.
- Identified and resolved all **VAPT** findings flagged by the bank, achieving full security sign-off; automated **Hive** table refreshes on data insertion, optimized deployment workflows, and implemented a **CI/CD pipeline** using **GitHub Actions** for production deployments.

PROJECTS

SkillBridge — Knowledge -Hub

MERN Stack (React.js, Node.js, Express.js, MongoDB)

🐙 <https://github.com/anasshaikh786/skillbridge-e-learning-platform> 🔗 Live Demo

- Developed a **MERN-based e-learning platform** with **JWT authentication**, **role-based authorization**, **OTP verification**, integrated **REST APIs**, managed state using **Redux Toolkit**, utilized **React Hooks** and **React Router**, integrated **Razorpay**, **Cloudinary**, and **SendGrid**, designed **MongoDB** schemas using **Mongoose**, and deployed on **Vercel**, **Render**, and **MongoDB Atlas**.

EDUCATION

B.Tech. (IT), Thakur College of Engineering & Technology

Jul 2019 – Jun 2023

CGPA: 9.47/10

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript (ES6+), SQL
- **Frontend:** React.js, Context API, React Router, Redux, Axios, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT, LDAP Authentication, Asynchronous Programming
- **Databases:** MongoDB, PostgreSQL, Oracle
- **Big Data:** Hadoop, Hive, HDFS, WebHDFS, Parquet
- **DevOps & Tools:** Git, GitHub Actions, CI/CD, Apache, Postman, Linux
- **Other:** Component-Based Architecture, Performance Optimization, Agile Development, VAPT/Security Remediation

ACHIEVEMENTS

- Participated in **JP Morgan's Code for Good Hackathon**, developing a technology solution for a social-impact challenge.
- Served as **Student Placement Coordinator**, liaising between recruiters and students for campus recruitment drives.
- Volunteered as part of the **Extension Work Team**, teaching underprivileged students in an online mode.
