SUMMARY

Full Stack Developer with nearly 3 years of experience building production-grade enterprise applications using React.js, Node.js, and Python, with strong expertise in Big Data integration (Cloudera Hive, HDFS) for banking systems. Proven track record of owning end-to-end application architecture, security compliance (LDAP, JWT, VAPT), and CI/CD automation, driving measurable improvements in process turnaround time and data integrity.

EXPERIENCE

Associate Software Engineer, Accenture

Sep 2023 – Present

Mumbai, India

- Replaced a manual Excel-extract-edit-overwrite process with a **direct form-based workflow** pre-filled from **Cloudera Hive**, reducing the data update cycle from 1-2 days to a few hours (**60-70% reduction in turnaround time**).
- Built a full audit trail via **maker-checker (dual control)** functionality, ensuring every data change is tied to a recorded requester and approver — replacing a process with zero traceability.
- Implemented **save-as-draft** functionality, consolidating previously multi-version email/Excel exchanges into a single saved entry, reducing duplicate submissions by an estimated **30-40%**.
- Designed and developed a **full-stack web application (React.js, Node.js, Python, Apache)** from the ground up, enabling users to submit form data and upload files directly into **Cloudera Hive tables** via **Cloudera WebHDFS** streaming with override/append options.
- Developed **vertical (role-based) access management, schema management, reporting management, and user management** modules to support structured, multi-team, audit-compliant usage.
- Architected the **end-to-end workflow** for the GAP Application and built a **deployment management module** with a dedicated deployment page for tracking production releases.
- Implemented **field-level validation, file preview**, automated conversion of uploaded data to **Parquet format**, and **SMTP email notifications** for submission events.
- Integrated **LDAP authentication** and **JWT-based session management**; configured **Apache Web Server** across Dev, UAT, and Production environments.
- Identified and resolved all **VAPT** findings flagged by the bank, achieving full security sign-off; automated **Hive table refreshes** on data insertion and set up a **CI/CD pipeline using GitHub Actions** for production deployments.

PROJECTS

SkillBridge — E-Learning Platform

MERN Stack (React.js, Node.js, Express.js, MongoDB)

🔗 <https://github.com/anasshaikh786/skillbridge-e-learning-platform> 📄 Live Demo

- Built a full-stack **ed-tech platform** with course browsing/purchase for students and content/analytics dashboards for instructors.
- Implemented **JWT authentication** with OTP verification, **Razorpay** payment integration, and **Cloudinary** media management; designed **MongoDB schemas** (Mongoose) and responsive UI with **React.js, Redux, Tailwind CSS**; deployed via **Vercel, Render, MongoDB Atlas**.

EDUCATION

B.Tech. (IT), Thakur College of Engineering & Technology

Jul 2019 – Jun 2023

CGPA: 9.47/10

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript (ES6+), SQL
- **Frontend:** React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT, LDAP Authentication
- **Databases:** MongoDB, PostgreSQL, Oracle
- **Big Data:** Hadoop, Hive, HDFS, WebHDFS, Parquet
- **DevOps & Tools:** Apache Web Server, CI/CD (GitHub Actions), Git, Postman, UNIX Commands
- **Other:** DBMS, VAPT/Security Remediation

ACHIEVEMENTS

- Participated in **JP Morgan's Code for Good Hackathon**, developing a tech solution for a social-impact challenge.
- Served as **Student Placement Coordinator**, liaising between recruiters and students for campus recruitment drives.
- Volunteered as part of the **Extension Work Team**, teaching underprivileged students in an online mode.
